- › Hybrid Model (Mix of Offshore and Onsite model)
- › Professional Services Model
- › Revenue Sharing Model

Outsourced Product Development at Zansys

Zansys Technologies is a premier outsourced services provider with niche focus on product design and development, application engineering, and quality assurance services. Our ability to provide extensive services across diverse competencies and verticals and our thorough understanding of the offshoring process makes us a frontrunner in this field. Zansys helps its clients maintain the competitive advantage through its product development services. From Development to Deployment, you can trust us with all your needs.

Offshore Development Team at Zansys

An Offshore Development Team (ODT) is a team of specialists formed as per our customers' unique development and business requirements. It functions from our Offshore Development Center in India on the basis of a fixed monthly fee. Zansys is experienced and capable of providing a highly talented dedicated offshore team of professionals. Our infrastructure is fully equipped to execute your software outsourcing needs.

Benefits:

- 25 to 60 % cost saving as compared to on site teams
- Upto 30 % reduction in time to market through ready availability of resources
- 3 tier IPR protection - Legal, Physical and Logical
- Single outsourcing partner for all your technology needs
- Direct control over resources and the entire execution process
- Easy communication via versatile means during convenient business hours
- Specialists with necessary qualifications for you
- Dedicated staff, just an extension of your in-house staff
- Working hours advantage for US and European customers
